PROFESSIONAL SUMMARY

Full-stack developer with a Master's degree in Distributed Computing and professional experience in .NET application development. Skilled in C#, ASP.NET Core, Entity Framework Core, relational databases and layered architecture, with experience contributing to enterprise ERP software and delivering production web applications. Building BizFlow, a public ASP.NET Core 8 API with PostgreSQL, CQRS/MediatR, automated tests and GitHub Actions CI. Seeking a .NET developer role focused on reliable business applications and backend engineering.

TECHNICAL SKILLS

.NET & Backend: C#, ASP.NET Core Web API, Entity Framework Core, MediatR, REST APIs, Swagger/OpenAPI, Dependency Injection

Architecture: Clean Architecture, CQRS, domain modelling, authentication & RBAC, multi-tenancy

Databases: Oracle, SQL Server, PostgreSQL, MongoDB

Testing & DevOps: xUnit, GitHub Actions (CI), Docker, Docker Compose, Git, GitHub

Front end & CMS: Next.js, React, Payload CMS, Angular, Tailwind CSS

Other back ends: Spring Boot, Symfony, Node.js

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Originis Solutions (Remote) Jan 2026– Present

ASP.NET Core · Entity Framework Core · Oracle · Next.js · Payload CMS

- Contribute to an enterprise ERP on Oracle with ASP.NET Core and Entity Framework Core, organised in separate Domain, Application, Infrastructure and Presentation layers.
- Organise business workflows with CQRS and MediatR, and build secure, maintainable APIs for business processes and data management using dependency injection and repository patterns.
- Delivered 2 production web applications with Next.js, React and Payload CMS, deployed on Vercel.
- Implemented authentication, role-based access control and real-time features; built headless CMS solutions with API integration and multi-tenant support.

Career Break and Self-Directed Development Dec 2020 – Dec 2025

- Planned career break for family responsibilities. Kept skills current through hands-on practice in .NET, C#, Next.js, React and Payload CMS.

Full-Stack Developer, SDI, Kairouan Aug 2020 – Dec 2020

Angular · Symfony

- Analysed client requirements and delivered technical solutions to specification.
- Performed corrective and evolutionary maintenance on client projects.

Full-Stack Developer, Itgate Group, Sousse Jan 2020 – Aug 2020

Angular · Spring Boot

- Gathered and analysed user requirements to deliver client-focused solutions.
- Maintained and improved applications based on user feedback.

Earlier experience: Network Engineer, Prima Call Centre, Sousse (Oct 2018 – Sep 2019) · IT Engineer, Testafid+, Sousse (Nov 2017 – Mar 2018)

SELECTED PROJECTS

Oracle ERP, Enterprise Application Ongoing · private project, details on request

ASP.NET Core · C# · Entity Framework Core · Oracle · Clean Architecture · CQRS · MediatR

- Developing an ERP with separate Domain, Application, Infrastructure and Presentation layers, organising business workflows with CQRS and MediatR.
- Building secure, maintainable APIs for business processes and data management, using dependency injection and repository patterns.

BizFlow, Business Management REST API · github.com/keraani-wided/BizFlow In progress · public

ASP.NET Core 8 · C# · EF Core · PostgreSQL · MediatR · xUnit · GitHub Actions · Docker Compose

- Layered solution (Domain, Application, Infrastructure, API) with a rich domain model: factory methods, a value object and validation rules inside the entities.
- Applying CQRS with MediatR use case by use case (customer creation done), with repository interfaces defined in the Application layer.
- xUnit unit tests on domain rules, GitHub Actions CI, PostgreSQL through Docker Compose, secrets kept out of source control (.env and User Secrets).
- Planned: JWT authentication and company-level data isolation.

Losange (Pilot TN), Live Learning Platform · losange.tn In production

Next.js 16 · React 19 · Payload CMS 3 · PostgreSQL · LiveKit · Centrifugo · Redis · private repository, code on request

- Built a full-stack platform combining public product pages, protected dashboards and a Payload CMS back office, **already in use by teachers and students**.
- Added live chat and session alerts (Centrifugo, Redis), live video sessions (LiveKit) and a collaborative whiteboard (tldraw).
- Automated session reminders with background jobs (graphile-worker on PostgreSQL).
- Localised in Arabic, English and French with next-intl, including right-to-left layout.

Cogito School, One-to-One Learning Platform

Next.js · React · Payload CMS · Tailwind CSS · Vercel · private repository, code on request

- Designed a multi-role system for students, trainers and administrators: course catalogue, private lesson booking, assignment submission and progress tracking.
- Structured content with Payload CMS collections, relationships and access control.

EDUCATION

Master of Research in Distributed Computing, ISITCom, Hammam Sousse 2014 – 2017

- Thesis on data exploitation of a 6TiSCH wireless sensor network: compared distributed (DeTAS) and centralised (TASA) scheduling, and designed an energy-aware routing metric and a node-failure diagnosis mechanism.

Bachelor in Computer Networks, ISITCom, Hammam Sousse 2011 – 2013

- Final project: secure wired and wireless network.

CERTIFICATION AND LANGUAGES

Certification: Full Stack Training, Angular and Spring Boot, Itgate Training, Hammam Sousse (Jan – Mar 2020)

Languages: Arabic (native) · French (fluent) · English (professional) · Spanish (basic)
