TECHNICAL SKILLS

.NET / Backend

C#, ASP.NET Core, Entity Framework Core, MediatR, REST APIs, Dependency Injection

Architecture

Clean Architecture, CQRS, Authentication & RBAC, Multi-tenancy

Databases

Oracle, SQL Server, PostgreSQL, MongoDB

Front end and CMS

React, Next.js, Payload CMS, Angular, Tailwind CSS, Bootstrap

Other back ends

Spring Boot, Symfony, Node.js

Tools

Git, GitHub, Docker, Vercel, Azure fundamentals

EDUCATION

Master of Research in Distributed Computing

ISITCom · 2014 – 2017
Thesis: data exploitation of a 6TiSCH wireless sensor network (DeTAS vs TASA scheduling, energy-aware routing metric, node-failure diagnosis).

Bachelor in Computer Networks

ISITCom · 2011 – 2013
Final project: secure wired and wireless network

LANGUAGES

Arabic – native
French – fluent
English – professional
Spanish – basic

PROFESSIONAL SUMMARY

Full-stack developer focused on .NET (C# / ASP.NET Core), with a Master's degree in Distributed Computing. I build secure REST APIs and business applications on Oracle and SQL Server, following Clean Architecture, CQRS/MediatR and Entity Framework Core. Currently contributing to an enterprise ERP project on Oracle. I also deliver complete web applications with Next.js, React and Payload CMS.

PROFESSIONAL EXPERIENCE

Full-Stack Developer – Originis Solutions (Remote) Jan 2026 – Present

ASP.NET Core, Oracle, Next.js, Payload CMS

- Contribute to an enterprise ERP system on Oracle with ASP.NET Core, Clean Architecture, CQRS/MediatR and Entity Framework Core (see Projects).
- Delivered 2 production web applications with Next.js, React and Payload CMS.
- Built headless CMS solutions with content routing, API integration and multi-tenant support.
- Implemented authentication, role-based access control and real-time features.
- Built responsive, SEO-optimised interfaces deployed on Vercel using SSR and SSG.

Self-Directed Training – Full-Stack Development Dec 2020 – Dec 2025

C#, ASP.NET Core, Next.js, Payload CMS

- Five years of independent training focused on .NET back-end development (C#, ASP.NET Core).
- Hands-on practice in modern web development with Next.js, React and Payload CMS.

Full-Stack Developer – SDI, Kairouan Aug 2020 – Dec 2020

Angular, Symfony

- Analysed client requirements and delivered projects aligned with their needs.
- Implemented technical solutions to specification and performed corrective and evolutionary maintenance.

Full-Stack Developer – Itgate Group, Sousse Jan 2020 – Aug 2020

Angular, Spring Boot

- Gathered and analysed user requirements to deliver client-focused solutions.
- Maintained and improved applications based on user feedback.

Earlier experience

- Network Engineer**, Prima Call Centre, Sousse (Oct 2018 – Sep 2019): managed attendance and leave reports, monitored tenders and RFPs, reviewed project specifications.
- IT Engineer**, Testafid+, Sousse (Nov 2017 – Mar 2018): maintained employee attendance and overtime records.

PROJECTS

Oracle ERP – Enterprise Application Ongoing

ASP.NET Core, C#, Entity Framework Core, Oracle, Clean Architecture, CQRS, MediatR

- Developing an ERP solution in Clean Architecture, with separate Domain, Application, Infrastructure and Presentation layers.
- Organising business workflows with CQRS and MediatR.
- Building secure, maintainable APIs for business processes and data management, using dependency injection, repository patterns and domain-driven design.

Losange (Pilot TN) – Learning Platform Recently launched · www.losange.tn

Next.js 16, React 19, Payload CMS 3, PostgreSQL, LiveKit, Centrifugo, Redis · Private repository, code on request

- Already in use by teachers and students.
- Built a full-stack platform combining public product pages, protected dashboards and a Payload CMS back office.
- Added live chat and session alerts with Centrifugo and Redis, live video sessions with LiveKit and a collaborative whiteboard with tldraw.
- Automated session reminders with background jobs (graphile-worker on PostgreSQL).

- Configured Arabic, English and French with next-intl, including right-to-left layout.

Cogito School – One-to-One Learning Platform

Next.js, React, Payload CMS, Tailwind CSS, Vercel · Private repository, code on request

- Designed a multi-role learning system for students, trainers and administrators.
- Implemented the course catalogue, private lesson booking, assignment submission and progress tracking.
- Created learning paths for primary, middle and high-school students in web development, mobile, data science and cloud computing.
- Structured content with Payload CMS collections, relationships and access control.

CERTIFICATION AND VOLUNTEERING

- **Full Stack Training, Angular and Spring Boot** – Itgate Training, Hammam Sousse (Jan – Mar 2020)
- **BLS/AED Provider Course** – Sahloul Hospital, Sousse (2015)
